ABOUT ME

Passionate about all things technology. With over 12 years industry experience, having overseen numerous projects through from inception to completion. Experience gained as a software developer as well as development leader - always striving to implement the best solution with the right tools. Extensive knowledge across the full spectrum of software creation, from the frontend through to the underlying operating system.

EXPERIENCE

Head of Technology → Technical Director

[Groundsure](#)

Dec 2016 - present

- Sitting on the board of directors, setting the company direction and overseeing the product & technology budget
- Hands on, building frontend applications with React and backend API's in Node.js
